Education

University of Illinois Urbana-Champaign — Urbana, IL
Bachelor of Science in Mathematics and Computer Science — *Dec. 2026*

Coursework: Computer Architecture, Data Structures, Algorithms, Graph Theory, Probability and Statistics, Systems Programming, Programming Languages and Compilers

Experience

Amazon — Sunnyvale, CA
Software Development Engineer Intern — *May 2026 – August 2026*

- Built a distributed Java Remote Strategy Service handling ∼ 9K TPS with a 120 ms production latency SLA for recommendation widgets on Amazon Sports & Outdoors product pages.
- Architected a modular strategy framework supporting N strategy IDs per implementation, reducing new strategy integration to 1 annotated class with automatic runtime discovery.
- Migrated the service to AWS Fargate, provisioning 8+ production infrastructure components including CloudAuth, PrivateLink, autoscaling, load balancing, and monitoring.
- Resolved 20+ dependency, authentication, and build issues from previous iteration for successful production deployment.

University of Chicago — Remote
Research Assistant Intern — *Jan. 2026 – May 2026*

- Improve scientific artifact discoverability and reproducibility for Trovi by integrating research artifacts for 10k users.
- Normalize metadata and write concise summaries to enhance data accessibility and utility for 100+ JSON requests.
- Refine search and analytics for coverage and trends to support the Chameleon project with 5 Github open source contributions.

National Center for Supercomputing Applications @ UIUC — Urbana, IL
Data Analyst Intern — *Aug. 2025 – Dec. 2025*

- Preprocessed geospatial and socioeconomic feature data for the Amazon in Brazil, enhancing data quality for analysis.
- Conducted data modeling, analysis, and predictive assessments to provide insights for decision-making processes.
- Created Graphical Neural Network (GNN) with Python, facilitating better understanding of complex data sets.
- Assisted in the development, training, validation, and testing of machine learning algorithms, improving model accuracy.

Warmly, (YC S20) (acquired by Hubspot) — San Francisco, CA
Software Engineer Intern — *Jun. 2025 – Aug. 2025*

- Implemented Salesflow email integration with TypeScript to optimize automation of customer outreach time by 87%.
- Integrated CRM system with React, Postgres, and SQL to simulate sales team interactions with Redis server for authentication, improving data management.

Projects

LLMJudge | *Firebase, TypeScript, Tailwind CSS*

- Developed a web app that benchmarks prompts and LLM outputs based on length and tone.
- Evaluated Gemini 2.0 Flash output with Perplexity Sonar, R1-1776, and Llama 3 via API calls.
- Stored data for prior prompts and scores in CSV and visualized overall evaluation scores with bar charts.

Rankd | *NextJS, Tailwind CSS, Supabase* | Link

- Designed a web app that allows users to play a ranking game for companies and brainrot characters.
- Implemented ELO Ranking algorithm that updates leaderboard continuously; scaled to handle 150+ users.
- Updated security measures for POST requests in database and decreased request latency by 25%.

Distinctions

- Stanford - CodeInPlace: CS106A Section Leader/Instructor
- Andreessen Horowitz - a16z: alpha speedrun finalist

Skills

Programming Languages: C, C++, Python, Java, SQL, JavaScript, TypeScript, HTML, CSS
Tools and Frameworks: React, NextJS, NodeJS, LangChain, Keywords AI API, PostgreSQL, Redis, AWS, Kubernetes, Burp Suite, OWASP ZAP, DirBuster, Fusion360
